Getting daylight right

The ideal amount of natural light

Natural light is essential to your wellbeing. The size, as well as the number of windows is fundamental to how your space will look and feel. Combining VELUX roof windows with vertical glazing is important as it allows daylight to enter your home from different angles. For optimal comfort, we recommend that the glazed areas represent **15-20%** of the overall floor space in your room.

A SIMPLE CALCULATION

Here are some examples:

Floor space under the roof	Recommended glazed area	Distribution of the glazed area	Number and size of roof windows
10 m ²	$\times 15\% = 1.5 \text{ m}^2$		2 X PK08 roof windows or 3 X MK06 roof windows
15 m ²	$\times 15\% = 2.25 \text{ m}^2$		2 X UK08 roof windows or 3 X PK08 roof windows
25 m ²	$\times 15\% = 3.75 \text{ m}^2$		3 X UK08 roof windows or 4 X PK10 roof windows

The size chart opposite highlights the glazed area measurements that each of our standard VELUX roof window sizes will provide.

Full external size guide available on [p66](#). Other glazed area measurements available on request. Please contact our customer service team on **01592 778 225** for further information.

DAYLIGHT IN YOUR HOME

You can never have too much daylight in your home. It will always make the space lighter and brighter.

Using our recommended calculation, the above images highlight the percentage of daylight achieved in each scenario and the effect multiple roof windows can have in a room.

Your kitchen extension – A beautifully light functional space

VELUX INTEGRA® electric roof windows transformed this room into a stunning and bright kitchen. Without roof windows, this room lacked direct sunlight because light from vertical patio doors has a limited reach. After VELUX roof windows were planned into this project, they brought in twice as much daylight – now it's a welcoming kitchen with room to cook, entertain and spend time with family.

Add VELUX ACTIVE to your VELUX INTEGRA® roof windows for optimum comfort and ease.

Featured VELUX roof windows: GGU PK10 007021U.

DAYLIGHT SOLUTIONS

To achieve the optimum daylight design, consider the size and function of the room and where daylight will be needed.

A single roof window will not spread the light throughout the whole room.

With 2 or more roof windows you can brighten the entire room and allow the daylight to reach deeper into the space.

VELUX RECOMMEND

VELUX INTEGRA®

Electric roof windows give you automation at the touch of a button. Controlling the temperature in your room has never been so easy.

Find out more on [p32](#) →

WHITE POLYURETHANE

Moisture-resistant and maintenance-free, perfect for humid kitchens.

LAMINATED GLAZING

Safety glazing will prevent glass falling into your home in case of breakage.

PLEATED BLIND

Available in both electric or solar powered options, pleated blinds are ideal for any contemporary kitchen.

Choose the perfect kitchen product bundle for your home.

See [p26](#) for more details.

Your extended living space – Adding the right amount of natural light

This dining room would have been quite gloomy without VELUX roof windows. As they are out-of-reach, VELUX INTEGRA® roof windows are the perfect choice, giving you daylight and fresh air at your fingertips. These can be easily opened or closed at the touch of a button.

Consider adding VELUX ACTIVE to your VELUX INTEGRA® roof windows, allowing you control from your smart phone.

Featured VELUX roof windows: GGL PK10 207021U.

DAYLIGHT SOLUTIONS

To maximise daylight, consider the balance between vertical glazing and roof windows carefully.

Bifold doors will bring daylight in from one particular angle.

Combine bifold doors with 2 or more roof windows to fill the space with twice the amount of daylight.

VELUX RECOMMEND

VELUX INTEGRA®

Electric roof windows give you control at the touch of a button, perfect for out-of-reach areas.

Find out more on [p32](#) →

WHITE PAINTED

Bright white finish with discreet wood grain requires less maintenance.

LAMINATED GLAZING

Safety glazing will prevent glass falling into your home in case of breakage.

PLEATED BLIND

VELUX pleated blinds are a great solution for practical living spaces, softening incoming light on a sunny day.

Choose the perfect living/dining room product bundle for your home. Turn to [p27](#) for further details.

VELUX INTEGRA® electric pleated blind.

Your bedroom – A bright and airy space

This bedroom was created by transforming an unused loft space. Installing both sloping and fixed VELUX roof windows not only adds a real wow factor, it dramatically increases the level of daylight flooding into the room. As well as a means of escape during an emergency, these top-hung roof windows allow stunning, uninterrupted views.

Featured VELUX roof windows: GPL PK08 2066 combined with a GIL PK34 2066 with DKL PK08 0705 & DKL P04 0705 blackout blinds.

Download the **VELUX MyDaylight App** to your phone and visualise how your own loft space could look with added daylight through the roof.

DAYLIGHT SOLUTIONS

Ensure you consider the number of roof windows to maximise the potential of your loft.

A single roof window will bring in some daylight, but not the optimal amount.

With 2 or more roof windows you can brighten the whole room with more daylight.

VELUX RECOMMEND

TOP-HUNG ROOF WINDOWS

Enjoy panoramic, uninterrupted views.

Other combinations available – please contact us for further information.

Give your loft conversion the wow factor it deserves

The top-hung upper section opens out, whilst the bottom section unfolds into a glazed balcony with side railings. The single balcony can easily be combined with additional top-hung and fixed sloping roof windows for even more daylight. Triple glazing is featured as standard, contributing to an energy-efficient installation, which includes a toughened outer and laminated inner pane for additional safety.

VELUX bundles – Completing your perfect project with ease

Achieving a hassle-free project means choosing the right materials and fittings. It's important to specify everything you need at the outset to get it right first time. If you have read through our daylight solution guide on [p4-5](#), you will have an idea of the size and quantity of roof windows you require for your space.

To make life easier, we've selected the optimal products for key projects, shown here as VELUX product bundles. You can order everything you need to optimise your installation with one single code, ensuring you choose the products that work best for the size and function of your room.

velux.co.uk/bundles

Single roof window bundles for kitchens

Kitchens see their fair share of steam and moisture, which is why our single kitchen bundles feature **one** roof window with a moisture-resistant white polyurethane internal finish. Complete with flashing kit and installation products, these bundles include the most effective use of product for your kitchen space.

1 **FLASHING**
Marries the roof window to the roofing material.

2 **INSTALLATION PRODUCT**
Ensures a well-insulated and weathertight installation.

3 **VELUX INTEGRA® ELECTRIC CENTRE-PIVOT WHITE POLYURETHANE ROOF WINDOW**
Can be operated remotely at the touch of a button to open automatically.

OR

4 **CENTRE-PIVOT WHITE POLYURETHANE ROOF WINDOW**
Ideal for when the roof window is set higher in the roof pitch or above furniture.

5 **ELECTRIC PLEATED BLIND**
Open and close your blind at the touch of a button.

6 **MANUAL VENETIAN BLIND**
Stylish blind, perfect for roof windows within reach.

Make your home smarter with VELUX ACTIVE. See p15

Both pleated blind options available in 2 colours. Choose from: white or beige.

Our product features at a glance

Our highly engineered roof windows have the latest technology built-in. Our research and development teams are continuously refining products to improve performance.

The following features come as standard with all of our roof windows and are designed to make installation and operation easier, as well as ensuring our products look their best.

We are the only roof window manufacturer offering safety glazing as standard.

Safety glazing as standard in all roof windows.

High quality pivot hinges for smooth operation.

VELUX ThermoTechnology™ uses less energy and keeps your home warm.

Easy cleaning of the outside pane with built-in barrel bolt.

Simple red and blue line bracket system differentiates between standard and recessed installation.

Ventilation bar lets fresh air into your home even when roof window is closed.

Click-on covers make your installation easier, faster and safer.

Straight-forward blind installation with our patented mounting brackets.

Pick&Click!®

The finishing touch to suit your home

THREE INTERNAL FINISH OPTIONS

Lighter, brighter modern living spaces are more popular than ever. To ensure you have the means to make the most of your project, we offer three internal finish options. All finishes have the same high VELUX quality combined with:

- laminated safety glass as standard
- straightforward installation
- excellent value for money.

WHITE POLYURETHANE FINISH

- Wooden core encased in moisture-resistant white polyurethane. The first choice for humid rooms such as kitchens and bathrooms.
- No visible joints, so dirt can't accumulate in the corners.
- Maintenance-free, which is ideal for out-of-reach areas.
- Thermally moulded timber core delivers improved insulation.

WHITE PAINTED FINISH

- Painted before assembly for a flawless finish and outstanding durability.
- Bright white finish with discreet wood grain matches perfectly with modern interiors.
- Lower maintenance than pine finish roof windows.
- Highly UV resistant, water-based breathable paint to preserve a crisp, bright look.

PINE FINISH

- Matches perfectly with traditional interiors.
- Protective triple coat clear lacquer helps to preserve the timber of the window.

Benefits:

- Convenient, even with furniture placed beneath the roof window.
- Easy to open and close with the ventilation bar.

Roof pitch

15°-90°

Suitable for roof pitches between 15° and 90°.

Consider **VELUX INTEGRA®** range for out-of-reach roof windows. See p32-33

Benefits:

- Enjoy panoramic views.
- Rotates 180° for easy cleaning from the inside.
- Most sizes suitable for emergency escape purposes.

Roof pitch

15°-55°

Suitable for roof pitches between 15° and 55°. Also suitable for roof pitches between 55° and 75° with special springs. Please specify when ordering.

Consider **VELUX INTEGRA®** electric top-hung roof windows. See p18

Opening options

45° OPENINGS
GPU and GPL roof windows open to any position up to 45°.

EMERGENCY ESCAPE
Due to the unrestricted opening area, a large selection of roof windows are suitable for emergency escape purposes.

Benefits:

- VELUX INTEGRA® roof windows have rain sensors meaning they automatically close when it rains.
- Ideal for out-of-reach areas.
- VELUX INTEGRA® roof windows offer control at your fingertips and provide fresh air, better indoor comfort and home security.

Roof pitch

Suitable for roof pitches between 15° and 90°.

All VELUX INTEGRA® roof windows are compatible with VELUX ACTIVE. See p15

Benefits:

- No need for a mains power supply.
- VELUX INTEGRA® roof windows have rain sensors meaning they automatically close when it rains.
- Ideal for out-of-reach areas.
- VELUX INTEGRA® roof windows offer control at your fingertips and provide fresh air, better indoor comfort and home security.

Solar powered

- All the same features as VELUX INTEGRA® electric roof windows, but powered by the sun.
- PV solar cell on external window frame requires some exposure to sunlight.

Benefits:

- Adding an additional fixed element underneath a sloping roof window will bring in even more daylight.
- Create the perfect combination for your space with a wide range of size and combination options (see p66 for available sizes).

Roof pitch

Suitable for roof pitches between 15° and 90°.

For more advice on how to select your roof windows visit: velux.co.uk/onlinebrochure

Sloping and fixed combinations

Give your home its own unique character

Multiple VELUX roof windows create gorgeous, light-filled rooms. By combining VELUX roof windows, you can create panoramic views and bring in twice the daylight. If the pitch of your roof continues to the floor, you can extend your VELUX roof window by installing an additional window element, GIU (white polyurethane) or GIL (white painted) below. These bottom elements have a fixed sash that cannot be opened.

Sloped additional elements

External frame size (nominal w x h) cm

Code	Glazing	MK34	PK34
White polyurethane – fixed			
For a maintenance-free white polyurethane finish additional roof window elements GIU can be installed below VELUX roof windows GGU and GPU.			
GIU 0070 U-value 1.3 W/m²K	Laminated inner, toughened outer pane.	£444	£513
GIU 0066 U-value 1.0 W/m²K	Triple glazed. Laminated inner, toughened outer pane. Anti-dew* and easy-to-clean coating.	£609	£678
White painted – fixed			
For a white painted combination additional roof window elements GIL can be installed below VELUX roof windows GGL and GPL.			
GIL 2070 U-value 1.3 W/m²K	Laminated inner, toughened outer pane.	£400	£462
GIL 2066 U-value 1.0 W/m²K	Triple glazed. Laminated inner, toughened outer pane. Anti-dew* and easy-to-clean coating.	£565	£627

*Anti-dew coating reduces number of hours external condensation is present.

Flashings – single

External frame size (nominal w x h) cm

EBY W10 2100	18mm gap adjustable trimmer (x1 for twin installation, x2 for triple installation). White painted.	-	-	£384

- ▶ All roof windows, single flashing and trimmers have a delivery time between 2-7 days.
- ▶ Delivery time is in working days from receipt of orders placed before 4pm (UK) and 11.30am (NI).

What does a conservation package include?

- Roof window with pre-fitted glazing bar.
- Laminated safety glazing as standard.
- Insulation collar and underfelt collar provided for a weathertight and energy efficient installation.

Roof pitch

20°-65°

Suitable for roof pitches between 20° and 65°.

VELUX conservation roof windows

For traditional buildings

When planning dictates that a window of traditional external appearance is required, conservation roof windows should be considered. All of our conservation roof windows have the same technical features of a VELUX roof window but in a traditional black conservation style.

Please visit velux.co.uk/onlinebrochure for information on how to create your own grey conservation package.

- Available in either centre-pivot or top-hung.
- Black external profiles and glazing bar.
- RAL colour 9005.
- Recessed installation for slate and tiled roofs.
- Top-hung roof windows listed below are suitable for emergency escape.
- Other sizes and glazing options available – contact us for further information.

Rooflights for uninhabited spaces

Rooflights

- Frame and integrated flashing made of maintenance-free polyurethane.
- Operated using a handle with three ventilation positions.
- Extruded aluminium sash which can be hinged on both sides, opening to an angle of 90°.
- Opening restrictor that engages at 90° only.
- Black internal and external finish.

Uninhabited spaces

Our rooflights are designed in such a way that you have the opportunity to bring light into uninhabited spaces. It is not advisable to use these rooflights in habitable rooms due to their thermal performance.

Replacing and upgrading roof windows

Let in more daylight, create more comfort and increase energy efficiency

Quick and simple

- Minimal disruption as roof windows are replaced in the existing aperture.
- Replacement installation can typically be finished in a day.
- Work can usually be carried out from the inside.

Always improving

- Improved thermal performance and sound reduction for greater comfort.
- Larger glazing areas allowing more daylight in.
- Upgrade to a white finish or VELUX INTEGRA® electric or solar powered roof window.
- Add a solar powered conversion kit to your existing manual roof window for automation.

Save time and money with VELUX replacement flashings

- EL and EW single replacement flashings allow old roof windows manufactured before April 2001 to be replaced without disturbing the interior finish of the room.

Replacement roof window flashings

Code	Description	CK01	CK02	CK04	MK04	FK06	MK06	MK08	UK04	PK08	SK06	PK10	UK08

Solar powered conversion kits

Code	Description	Price
KSX 100	Conversion kit to upgrade to full VELUX INTEGRA® solar powered functionality of GGU or GGL centre-pivot roof windows manufactured between April 1986 and January 2014 (includes rain sensor). Not compatible with M27, P25 and 425.	£235
KSX 100K	Conversion kit to upgrade to full VELUX INTEGRA® solar powered functionality of GGU or GGL centre-pivot roof windows manufactured after February 2014 (includes rain sensor). Not compatible with CK01, CK02, MK27, PK25 and SK01.	£235

- ▶ All conversion kits have a delivery time of 2 days.

Installation products

Building regulations relating to insulation and air-tightness of roof window installations have become more stringent. We have not only developed a range of installation products to help make it quick and easy for you to be compliant, but also offers increased energy efficiency.

Vapour barrier – BBX

- Helps prevent condensation from forming in the roof structure.
- A fully welded rubber gasket with a double pressure seal guarantees speedy installation and a vapour and air tight solution.
- Reinforced corners for extra security against perforation.

Insulation collar – BDX

- Insulates around the roof window frame, reducing heat loss and eliminating cold bridges.
- Supplied with BFX underfelt collar.
- Click fittings ensure fast and accurate assembly.

Underfelt collar – BFX

- Ensures a weathertight seal between the roof window and the roof.
- Made from diffusion open material to minimise risk of condensation.
- Comes with transverse drainage gutter to lead water away from the head of the roof window if a tile or slate is broken above the window.

Flashing

- Marries the roof window to the roofing material and ensures a weathertight seal.
- Standard VELUX flashings are compatible with VELUX installation products.

Without

With

VELUX sun tunnels

Natural daylight where you never thought it could be achieved. Ideal for windowless bathrooms, hallways and walk-in wardrobes.

Rigid sun tunnels for pitched roof

- Rigid tunnels are recommended for maximum daylight.
- Recommended tunnel length 0.9-6m.
- 1.7m tunnel supplied (ZTR extensions are available).
- Available in 10 and 14 inch diameter.

Flexible sun tunnels for pitched roof

- Flexible sun tunnels should be used where a rigid tunnel is not suitable.
- Recommended tunnel length 1.5m.
- 2m tunnel supplied.

Flat roof sun tunnels

- Available in flexible.
- Supplied with PVC kerb and polycarbonate dome.
- Recommended tunnel length 0.2 – 0.9m.
- 0.9m tunnel supplied.

Sun tunnels

ZTR OK14 0062	600mm extension section for 14" rigid diameter sun tunnel.	-	£62
ZTR OK14 0124	1,200mm extension section for 14" rigid diameter sun tunnel.	-	£119
ZTL 014	Low-energy light kit for 10" and 14", fits inside tunnel, requires mains connection. Bulb supplied.	-	£79

- ▶ All sun tunnels and accessories have a delivery time of 2 days.
- ▶ Delivery time is in working days from receipt of orders placed before 4pm (UK) and 11.30am (NI).

Suitable for roof pitches between 15° and 90°.

Smoke ventilation systems

Smoke ventilation system for pitched roofs

Code	Description	SK06	UK08
External frame size (nominal w x h) cm: 114 x 118, 134 x 140			
Packages include: Single electrically operated GGU white polyurethane roof window with laminated inner pane for additional safety, 1 smoke sensor, 1 break glass point, 1 wall control (KFX 210) and suitable flashing. Additional smoke sensors and break glass units can be purchased separately.			
GGU SD0L140 U-value 1.3 W/m²K	GGU 0070 roof window + flashings for slate up to 8mm thick.	£1,666	£1,765
GGU SD0W140 U-value 1.3 W/m²K	GGU 0070 roof window + flashings for tiles up to 120mm in profile.	£1,666	£1,765
KFD 0000	Wind deflector (for compliance to aerodynamic smoke ventilation requirements).	£491	£553

Available for 1m² (SK06 size) or 1.5m² (UK08 size) of smoke-free ventilation area.

- For geometric smoke ventilation, our systems are tested and certified to EN ISO 12101-2 for roof pitches between 15-90°.
- For aerodynamic smoke ventilation, our systems are tested and certified to EN ISO 12101-2 for roof pitches between 15-60°.
- Comes with laminated inner pane for additional safety.
- System can be upgraded to comply with aerodynamic smoke ventilation requirements by the inclusion of the optional KFD external wind deflector.
- Other sizes available, contact us for further information.

Flat roof smoke ventilation system

Innovative solution for a flat roof where smoke ventilation is required. Available for 0.88m² (100x100cm) or 1.30m² (120 x120cm) of smoke-free ventilation area.

- Double-glazed window with protective polycarbonate cover.
- AA fire rated.
- Tested and certified to EN ISO 12101-2.
- Smoke sensors, control systems and break glass units to be purchased separately.

When ordering your flat roof window, please ensure you order a base unit (CSP) and compatible dome.

Flat roof smoke ventilation

KFK 100	Break glass unit.		£74

- ▶ All smoke ventilation products have a delivery time of 2 days except KFD 0000 which are 7 days.
- ▶ All roof windows have a delivery time of 2 days.
- ▶ Delivery time is in working days from receipt of orders placed before 4pm (UK) and 11.30am (NI).

This image is for illustration purposes only. Colour not a true representation.

Compatibility

To find out more about the compatibility of roofing materials, flashings and different installations (such as thatch and interlocking slate tile), please go to velux.co.uk/flashings

Opening sizes depend on the flashings used. Instructions available online.

Flashings

We provide a range of flashing options to suit your roofing material. The information below will help you to select the most appropriate flashings for your installation.

EDN / EKN

20°-90°

- Recessed flashings for installing roof windows into slate up to 8mm thick.
- EDN 2000 Includes BDx 2000F insulation package as standard.
- Not for interlocking slate.

EDJ / EKJ

20°-90°

- Recessed flashings for installing roof windows into flat or profiled roofing material up to 90mm in profile.
- EDJ 2000 Includes BDx 2000F insulation package as standard.

EDT

20°-90°

- Flashing for installing roof windows into flat tiles between 15mm-40mm in thickness.
- Perfectly designed for flat tiles providing a neater finish.

Available Summer 2020

EDL / EBL / EKL

15°-90°

- Flashings for installing roof windows into slate up to 8mm thick.
- Not for interlocking slate. See EDW for details.

EDW / EBW / EKW

15°-90°

- Flashings for installing roof windows into flat or profiled roofing material up to 120mm in profile.
- Also for interlocking slate, thatch and profiled sheeting.
- Our EDW flashing suits virtually every installation and supersedes EDZ as our standard tile flashing.

EDP / EBP / EKP

25°-90°

- Flashings for installing roof windows into plain tiles (max length 300mm).
- Maximum thickness of 14mm.

Recessed and standard flashings

Featured: EDJ recessed tile installation.

Featured: EDW standard tile installation.

Recessed flashings

Recessed flashings provide a sleek and streamlined finish as the roof window is installed deeper into the roof structure (see image above), meaning that less of the roof window protrudes above the roofline. We recommend BDx insulation collar and BFX underfelt collar, included in EDN and EDJ 2000, for optimum energy efficiency.

Recessed installation height – install the brackets at the sides of the roof window frame, at the blue line level.

Standard roof window flashings

We provide a range of flashing options to suit your roofing material. The table below will help you to select the most appropriate flashings.

Standard installation height – install the brackets at the top and the bottom of the window frame, at the red line level.

EDN, EDJ, EDL, EDW and EDT 2000 variants come with installation products included.

- ▶ Support trimmers have a delivery time of 2-7 days.
- ▶ Roof window profile sets have a delivery time of 2 days.
- ▶ Delivery time is in working days from receipt of orders placed before 4pm (UK) and 11.30am (NI).

Benefits:

- Elegant solution for externally visible installations.
- Glass-to-edge construction allows for a clear, uninterrupted view.
- Low maintenance due to curved glass allowing rain to run off.
- Choose the electrically-vented base unit with VELUX INTEGRA® for comfortable, automated operation.

Roof pitch

Suitable for roof pitches between 0° and 15°.

Select your top cover and base unit to configure your flat roof window.

VELUX curved glass rooflights

The stylish solution

This rooflight has a unique curved glass surface that lets in more daylight and stands out externally as a modern addition to roof surfaces. Combining a curved glass top cover with either an electrically operated base unit or a fixed base unit will give you a value of 0.72 Urc, ref300.

Curved glass rooflight

Build your rooflights just the way you want them with VARIO by VELUX

Custom-made designs that bring endless daylight and welcome nature indoors.

You can bring your daylight dreams to life with a huge variety of shapes, colours and features to create the ultimate blend of natural light for your home.

Roof pitch

Suitable for roof pitches between 0° and 15°.

Featured: The Rectangular One, 2,970mm wide x 1,300mm long 150mm upstand, fixed, jet black. £2,641.

Why VELUX Modular Skylights?

VELUX Modular Skylights are specially designed to bring more natural light into modern, flat roof homes and extensions. Modularity allows you to design with daylight over larger roof expanses, with an end result that blends more with the surroundings.

Roof pitch

Suitable for roof pitches between 0° and 15°.

VARIO BY VELUX Bespoke Rooflights

Explore endless possibilities and combinations

Design your own rooflights

We want to make your life easy when it comes to designing with daylight. Visit our website and try our Build Your Own configurator. Create your own flat roof iconic designs suitable for roof pitches between 0° and 15°.

- Design a bespoke rooflight that fits your project with sizes going up to 4m² of clear internal glass measurement.
- See a live 3D illustration of the rooflight you are configuring.
- Get real time prices on our bespoke rooflight range.

VELUX Modular Skylights

Open up larger roof expanses

Unique design

VELUX Modular Skylights offer a slim profile design, which is great for modern homes that need to make the most of the daylight. Electrics and motors within vented modules are concealed, creating a simple and refined look, inside and out.

Light up the rooms in your home

The kitchen is the heart of the home, and the range of activities we enjoy there means that the lighting must meet everyone's needs, whilst also keeping the room looking good, morning, noon and night.

With VELUX Modular Skylights, the light enters directly from above, right into the centre of your room. This is a much stronger source of illumination than limited light coming from your vertical windows.

Prices from
£1,455 ex VAT.

Blinds and shutters for any room

Whether you want to soften incoming daylight or block it out completely, our extensive range of blinds and shutters offers the ideal solution to suit your space. Available in a wide variety of styles and colours, you'll be able to find the perfect VELUX blind or shutter for your home.

White-line blackout blinds

Our full range of manual blackout blinds are now available with white side channels, blending in seamlessly with our white painted and white polyurethane roof windows.

Find out more on [p55](#) →

VELUX solar powered soft shutters

The new VELUX soft shutter delivers effective heat protection, keeping your home cool on sunny days and the lightweight fabric provides blackout for a better night's sleep.

Find out more on [p63](#) →

How to select your blinds

- 1 Select type**
Choose an interior and/or exterior VELUX blind or shutter that meets your requirements in terms of heat protection, blackout, light adjustment or insect protection.
- 2 Select colour and design**
Our blinds are available in an extensive range of exciting colours and designs.
- 3 Select operation method**
Choose between manual or automatic operation. Always consider electrically-operated products for out-of-reach areas.
- 4 Select the right size**
Check the data plate which displays the type and size of your roof window – you must match the blinds you order to this information. See the chart below for more details.

VELUX roof window data plates

5 Installed in minutes

VELUX interior blinds are easily installed with our unique Pick&Click!™ system. Follow the instructions, and your blinds will be fitted in minutes.

Pick&Click!™

New VELUX roof windows are fitted with pre-installed brackets to ease installation and to ensure a perfect fit every time.

All VELUX internal blinds are power operated or cordless operated and fulfil the safety in use requirements in EN 13120:2009+A1:2014 and EN 60335-2-97:2006+EN 60335-2-97:2006/A12:2015.

Sizing chart

It's simple to make sure you order the right size of blind:

- Check your roof window's data plate, then use the SIZE CODE to find its measurements on the chart below.
- Now you can check the price of your chosen blind on the following pages.
- Make sure you use the SIZE CODE on your roof window's data plate when ordering your blind at veluxblindsdirect.co.uk

External awning blinds

The VELUX awning blind is an external blind perfectly suited to stop strong sunlight and heat before it reaches the pane on your roof window. These unique blinds are ideal for keeping rooms cool and reducing the heat of the sun on hot days.

- Reduce heat by up to 76%.
- Weather resistant fabric for longer lasting performance.
- Install from the inside in minutes.
- Available in electric and solar powered operation.
